

# SP Series Presses

The Midward Supply **SP Series Presses** are small, electric, servo powered presses tooled for manual load applications involving eyelets, grommets and snap fasteners. These machines offer affordable and reliable solutions for customers needing more than a hand press. The Model SP2 is the lighter duty option for EYELETS and SNAP FASTENERS, while the larger SP4 is engineered with more power for the installation of SELF-PIERCING GROMMETS. Both models features a target light for locating the fastener position on the material, and integrated safety features. The machines include a Work Table, along with a manual foot pedal mechanism to cycle the machine.

**Model SP2**

**Model SP4**

To find out how the SP Series Presses can work for you, please send us samples of your eyelets, grommets and/or snap fasteners, along with the material, and we will perform an application evaluation and advise you of our recommended machine. A better, easier way of installing fasteners is available today!

## Specifications (SP2/SP4)

- Throat Depth: 3"/5"
- Work Height: 34" (on table)
- Electrical: 115 VAC, 60 HZ, 1 PH
- Weight (lbs): 76/122
- Footprint: 39" Depth x 21" Wide
